Alexandria, VA 22313-1450

**MAIL STOP RCE**

S I R :

This is a response to the requirement under 37 CFR 1.133(b)  
that applicant provide a statement of the June 17, 2009 telephone  
interview between Examiner IP and the undersigned.

On page 3 of the May 29, 2009 Advisory Action, it was stated  
that claim 2 recites merely a binary Cu-Mo alloy and fails to  
define the structure of the sputtering target.

During the aforesaid telephone interview with the Examiner,  
the Examiner acknowledged that a sputtering target is a well-  
known structure. The Examiner stated that merely amending the

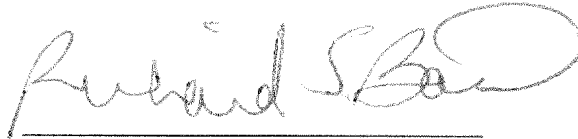

claims to further define the sputtering target may not by itself avoid the prior art rejections of record.

During the aforesaid telephone interview with the Examiner, the undersigned asked the Examiner if the Examiner had any suggestions for advancing the prosecution of the above-identified application.

The Examiner suggested that applicant provide evidence of unexpected results for using 0.1 to 3.0% by weight Mo in the form of a DECLARATION UNDER 37 CFR 1.132.
